SUMMARY ▾

Medical

Health care is expensive and few individuals can afford to pay the full costs. Having a medical plan can help cover the treatment you need without incurring huge medical bills.

Most Americans have private health insurance or participate in public programs, such as Medicare and Medicaid. However, many Americans are uninsured due to finances and/or pre-existing conditions.

SUMMARY ▾

Vision

Vision insurance policies typically cover routine eye exams and other procedures, and provide specified dollar amounts or discounts for the purchase of eyeglasses and contact lenses. Some vision insurance policies also offer discounts on refractive surgery, such as LASIK and PRK.

Vision insurance only supplements regular health insurance. Regular health insurance plans protect you against financial loss due to unexpected eye injury or disease.
